PROFESSIONAL EXPERIENCE

2009-2016 Tech Support | Individual work

Worked as tech support individually upon request. Usual work included fix or modification of mobile and desktop devices such as Android phones, Apple Ipods and Iphones, laptops, and desktops. As well as tech advising such as when purchasing new equipment for interested customers.

2011-2014 Babysitting | Individual work

Work as a babysitter from time to time individually as requested by customer.

2011-Now Palms Community Park Volunteer | City of Lakewood CA

Volunteered to gain experience in a working environment by being tech support as well as tutoring younger children, maintaining a clean environment, and setting up special events such as management gathering as well as holiday events.

2011-Now Hawaiian Gardens Volunteer | City Of Hawaiian Gardens CA

Volunteered to gain experience in a working environment by being tech support as well as tutoring younger children, maintaining a clean environment, and setting up special events such as management gathering as well as holiday events. I also had the opportunity to help in the office with minor tasks such as stapling papers together and making copies.

2014 Film making | Individual work

Worked creating a film with a film crew, my positions were film editing, vfx production, and 3D modeling For my work I used the Adobe suite, such as Adobe After Effects, Adobe Premiere, and some Adobe Photoshop. I also gained familiarity with cinema 4D.

2015-2016 Mobile Application & Website Tester | Veyo - veyo.com

Worked closely with application development team testing an application similar to that of Uber and Lyft called Total Transit.

Job consists of on site testing for finding bugs by simulating real life situations with a team divided into drivers and passengers.

Tested company websites for new products.

2015-2016 Freelance Work | IT & Software Services

Provide IT support services to small companies and local business ranging from hardware setup and general computer maintenance to Operating system installation.

Provide custom software development building software from the ground up or through the integration of popular service APIs like google services, sound cloud, twiitter, and slack.
